

UNIVERSITY OF
SOUTH CAROLINA

Child Development Research

Lab Director: Jane Roberts, Ph.D.

This study has been reviewed and approved by the USC Institutional Review Board

Children experience amazing development during their infant & preschool years. We are interested in learning about the nature of child development and the experiences of children's families. This study includes assessments that can take place either in the child's home or at USC. Travel expenses to USC will be covered and compensation for participation will be provided.

We are recruiting families with:

- Children w/ Autism Spectrum Disorder (ASD) & developmental delay (age 2-4 years)
- Siblings of children with ASD (age 12 months or younger, males preferred)
- Children with Down syndrome (age 12 months or younger)
- Typically developing males (age 12 months or younger)
- Typically developing males (age 3-4 years old)
