Do you have an infant with an older sibling?

Are you interested in learning about your infant’s development and helping researchers understand the development of Autism?

If so, we invite you and your baby to participate in:

**UM SIB SMILE**

A study to learn more about the social-emotional development of infants, including siblings of children with an Autism Spectrum Disorder.

Infants between 2 months and 12 months of age who have an older sibling,

You and your baby will participate in several visits over the first 4 years of life in order to evaluate your baby’s communication and mental development. You will be compensated for your time.

Please call our team at the University of Miami at (305) 284-1042 or email our licensed psychologist, (Dr. Kara Kelley Lyons) at umchildresearch@psy.miami.edu obtain additional information about our study.
